Standard Equipment - all Tongue Towed Models PR72 PR72-WR PR72-SG PR72-SB PR72-PW PR72-HW PR72-MN

6 "Operator Lift Control Systems" available.

More choices than any other manufacturer. Includes 5 choices of electric lift plus manual lift. We have the perfect system for everyone!

Adjustable Tongue & Hitch System. Pin Style Hitch standard. Quickly adjusts to different tow machine drawbars heights without tools.

Standard Equipment

— Heavy Duty Electric Actuator 99% of Assembly completed at the factory!

Heavy Duty, Durable, Steel Welded Frame.

Height Adjust & Leveling System for front blade. Quick, easy side to side adjustment guarantees the leveler always cuts evenly side to side.

Pro Groom

Exclusive 2-Bladed Leveler Implement. **If you've ever seen perfect leveling then it must have** been our Pro Groomer since no other machine on the market has this **"Level Flo 2"** technology. Adjustable to constant changing conditions of infields. The exclusive 2-Blade technology (front & rear) levels and grades by cutting off high areas, mixes material as **it travels, and releasing it into low areas where it's** needed. Blades cut 100% of their width (no open gaps left behind). Does not disturb the important layering between the top infield material and the lower sub soil layer. Completely adjustable in all directions. Controls weeds. Deters water puddling & compaction. Premium Powder Coated Finish.

> Rear Smoothing Broom is standard. Creates smooth, professional finish to the grooming process. Synthetic poly brushes designed specifically for our groomers. Long wear. Will not rot.

No-Air, No-Flat Wheels. Flat tires are a nuisance and render a machine un-usable. Our hassle-free wheels never need air and are standard on all tongue towed groomers!

Helping Those Who Help Others Play!

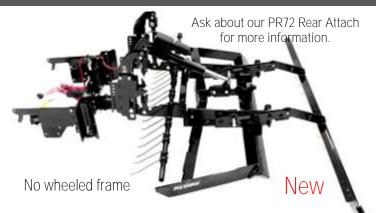

"Rear Quick Attach Versions" now available.

See corresponding catalogs for "Direct Attach" Versions of our Pro Infield Groomer for more detailed information...

PR72-QX "Quick Attach" with easy "Latch & Lock" Lift System.

John Deere Gator TX is a popular maintenance vehicle. Customers have requested the ability to direct attach the PR72 Pro Groomer behind their Gator TX. The TX does not have a rear drawbar or hitch capable of carrying the Pro Groomer so we developed our new rear **quick attach "Lift and Latch System"**. **Directly attaches to** the rear of a Deere Gator TX machine. Includes our exclusive 2-Switch Wiring System giving the user front dash and rear under box lift controls. Note: this design connects to newer versions of Gator TX vehicles with 1-1/4" rear receiver hitch.

PR72-QR "Quick Attach" with easy "Latch & Lock" Lift System.

Some customers want to direct attach behind their UTV using their 2" receiver (no wheeled frame). We responded with a

2 Inch Receiver

PR72 Pro Groomer (for UTV's)

Includes our exclusive "Lift & Latch" System. Includes our exclusive 2-Switch Wiring System giving the user front dash and rear under box lift controls.

Ask about our PR72 Rear Attach for more information.

PR72-TP "3 Pt. Lift System" Refer to PR72 Rear Attach Catalog for more information.

Some customers want to lift and carry the Pro Groomer behind small tractors (no wheeled frame). We responded with a 3 Pt. Lift PR72 Pro Groomer.

Includes our exclusive 3 Pt. Lift frame. It's convertible for used as direct attach to rear of tractor "with or without" a tractor guick coupler (or guick hitch).

Ask about our PR72 Rear Attach for more information.

Plus we've developed a new wider version of the Pro Groomer. Ask about our PR90-TP (3 Pt. Lift. Version).

Also ask about our New PR90 Pro Groomer (90 inch wide version).

PR90-QX PR90-QR PR90-TP

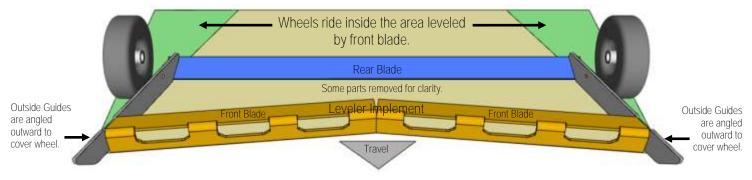

Heying Company Alton, Iowa 51003 Ph. 712.756.8847 Fax 712.756.8849 www.HeyingCompany.com www.Infield-Drag.com www.InfieldGroomer.com

New

Infields Need to be Smooth and Level !

Making an infield smooth is relatively easy. Leveling them requires a much higher degree of engineering.

Important Features that Sets our PR72 Pro Groomer Apart

Blades cut 100% of the surface while grooming.

Unlike other machines our Pro Groomer leveling blades cut 100% of the surface. Does not leave areas un-cut.

As the Front Blades Level the Wheels Ride "inside the cut area" towards the ends of the Leveler.

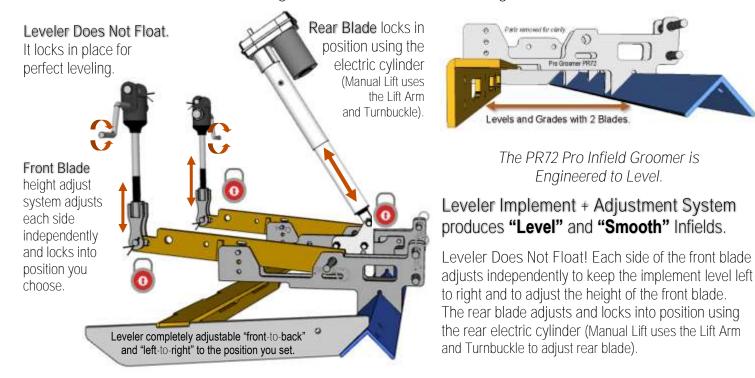

This creates a smooth path for the groomer for improved leveling.

Two Blades level better than one.

Pro Groomer Leveler Implement "Locks Into Position" to Level.

Floating Implements, such as steel drag mats, simply cannot level an infield. They might help smoothen but they ride up over high areas (don't cut it off) and sink down into low areas (tend to drag material out).

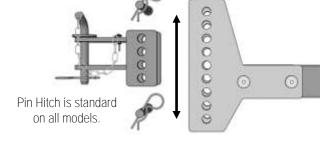

In order for an implement to level it must "Lock into Place" and not float. Our Leveler Implement travels over material and cuts high areas, carries material along, and releases it into low areas.

INMATCHED^{Engineering}

Adjustable Hitch design helps you quickly adjust the Pro Groomer (without tools) to the drawbar of your tow machine (Optional Ball Coupler hitches also available).

Key Features & Benefits PR72

- Levels Mixes Smoothens as you groom.
- Leveling Implement "Locks into position to guarantee leveling takes place"
- Completely adjustable to current infield conditions
- Cuts High Areas and Fills Low Areas
- Reduces Need for Hand Raking
- Breaks up hard infields (optional accessories)
- Maintains safer playing surface
- Deters water puddling
- Controls Weeds
- More Lift Systems to choose from than any other manufacturer (all made in the USA).
- No Air No Flat Wheels do not need air and never go flat.
- Heavy Duty Steel Construction
- Powder Coated finish
- Pull with a variety of towing machines
- No tools needed to adjust engineering
- Works on all infield materials
- Built Like a Tank!
- Easy to Use
- Affordable
- Saves Labor
- We do 99% of the Assembly.
- 36 Month Limited Warranty (there is no better warranty in the business)

We Help Those Who Help Others Play!

Heying Company Alton, Iowa 51003 Ph. 712.756.8847 Fax 712.756.8849 www.HeyingCompany.com www.Infield-Drag.com www.InfieldGroomer.com

Legendary Performance

Rear Smoothing Broom is standard. Our exclusive poly brushes (designed by Heying Company) are not available from any other supplier. Brushes will not take on water. Will not rot. Specially designed for long life.

Level & Smooth Infields! We Guarantee It!

Pro Groomer

Optional Accessories

Optional Scarifiers. Pulverize - Shatter - and Break up Hard Infields.

PRCH-5825 Chisel Scarifier

Chisel Scarifier is more effective on hard infields than the Spring Tines. Pulverizes & shatters hard-compacted infields to improve playability. Exclusive abrasion resistant steel teeth.

making contact. When needed it's dropped down to the "engaged" pins to pulverize. Rear Broom and Drag Mat Drag can

be mounted behind Chisel to help break up chunks and smoothen. Teeth are easy to replace when needed.

Also see Drag Mat option that helps break up chunks created by the Chisel Scarifier.

In-Season. Should only be used to pulverize the very top portion of infields (1/4" to 1/2" or so) during the season.

Off-Season. Capable of deep till to depth up to 2-3/4" to mix material, remove weeds, etc. but should never be used deep enough to disturb infield layers.

Two reasons the Chisel Scarifier cannot be used while grooming. 1) Infield layers are very important. You should never penetrate too deep into an infield and disturb the layers. If the Chisel was used while grooming then it might mask, or hide, what is actually being done to the infield. So, for safety, we design the Chisel Scarifier process to be a separate process from grooming.

2) It demands a lot of power especially when penetrating deep into infields (during off-season).

Drag Mats (2 Sizes available).

Steel Drag Mats are especially useful when breaking up hard infields (which creates chunks). <u>Two Choices of widths.</u>

72" wide x 36" deep (same width as 72" Broom) 78" wide x 36" deep (overlaps 72" Broom)

Option includes our exclusive brackets that not only pull the drag mat during use but also hold the rolled mat during travel off the field. No tools needed to adjust or remove the mat.

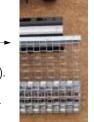

Tield. No tools neede

ALDM-7236 (72" Wide x 36" Deep)

ALDM-7836 (78" Wide x 36" Deep)

72" wide mat is same width as 72" Rear 2-Brush Smoothing Broom (Drag Mat is adjustable side to side in 1" increments if desired) This option includes ou exclusive Drag Mat Brackets

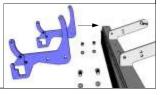

S	78" wide mat is
	overlaps the
h	72" Rear 2-Brush
٦.	Broom at each end. ——•
to	(Drag Mat is adjustable side to side in 1" increments if desired). This option includes our
).	side in 1" increments if desired).
Jr	This option includes our
S.	exclusive Drag Mat Brackets.

ALDM-1000 Drag Mat Brackets Only

Order this option if you wish to use our exclusive Drag Mat Brackets with your steel roll up drag mat. Note: We install a 1" square support tube to the front pull edge of all

of our Drag Mats to add support and so they mount correctly in our brackets. If you use your own drag mat with our brackets then we recommend you also install a square support tube.

Pg. 6

PRST-6800 Spring Tine Scarifier

Spring Tine Scarifier

Can be used while grooming - **that's** the only advantage it has over the chisel scarifier. Spring tines are not as effective breaking up hard infields as the hard tooth chisel. For customers

who want to be able to lightly pulverize ahead of the grooming process. It attaches to the front of the machine and provides pulverizing action ahead of the Leveler & Broom implements.

Two rows of staggered spring tines. Each row independently adjustable (without tools) to different angles. Mounts to front of the groomer.

Warning: The Spring Tine Scarifier adds approx. 48 lbs. to the front of the groomer (tongue weight). This adds to the total weight when lifting on the tongue to connect the groomer to a tow machine (or when disconnecting). This is most noticeable for those who have the **"WR" electric lift system which includes a heavy 12 volt battery on board.** This combination of the Tines and Battery make the tongue quite heavy when lifting.

Note: Customers with extremely hard infields (especially infields with sand mixtures) should consider the Chisel Scarifier which is more effective on hard infields.

PRGB-7200 High Speed Grading Bar High Speed Grading Bar High speed grading bar stored behind leveler on upper "non engaged" pins (when not being used) Customers choose the PR72 because they want perfect leveling. To provide this benefit the Pro Groomer performs Levele at optimal speeds of 4 to 5 mph. High Speed Grading Bar does not contact the surface in th There are times however when some customers need a quicker way to groom When lowered to o the "engaged" pins only the High Speed Grading infields. Customers such as those who: Bar contacts the surface for fast grooming. - Run all day tournaments. Levele - Run double headers. High Speed Grading Bar attaches behind the Leveler the same - Have lots of fields to cover. way the Chisel Scarifier attaches. Tournaments: Customers who run day long tournaments with very tight schedules groom

all of their infields before the day's play with the normal 2 bladed Leveler. Then between games, if time is short, they cut prep time in half using this high speed implement to quickly smoothen infields (doubled your speeds up to 8-10 mph). After the day's games are done they groom infields with the 2 blade Leveler Implement (normal process) to bring them back to perfectly level.

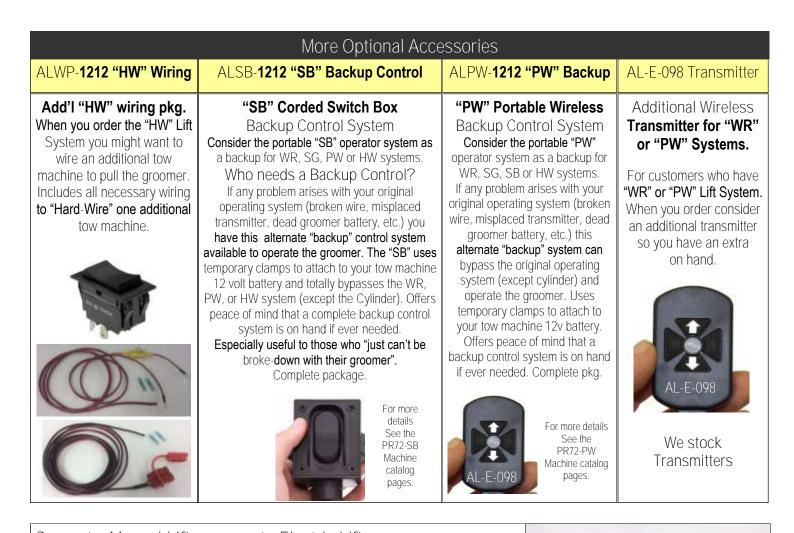

Double Headers: Customers who have double headers groom their infield before the first game with the normal 2 bladed Leveler. Then between games, if time is short, they cut prep time in half using this high speed implement to quickly smoothen infields (doubled speeds up to 8-10 mph). After the final game they groom with the 2 blade Leveler Implement (normal process) to again achieve a perfectly level infield.

Lots of Infields to Maintain: Customers with many (sometimes dozens) of infields may not have the time to perfectly level every infield every day. Some fields are groomed the normal process every day - just not all of them. Say for example a customer has 18 fields. Each day 6 infields are groomed with the 2-Bladed Leveler. The remaining 12 are groomed at twice the speed with the High Speed Grading Bar. The next day a different 6 fields get perfect leveling, and the process keeps rotating.

To maintain our "no tools needed engineering" we designed the High Speed Grading Bar to attach to the rear of the Leveler the same way that the Chisel Scarifier attaches. It's stored on the upper "non-engaged" pins (it will not contact the infield when in the non-engaged position) so it's ready to use when needed. Then it's quickly moved down to the lower "engaged" pins for high speed grooming (when in this position the 2 bladed Leveler does not contact the infield surface). The Rear Finishing Broom (and Drag Mat if you have it) attach directly to the High Speed Grading Bar for final finishing.

More Accessories & Options PRRB-1925 The Pro Groomer comes standard with an PATS-2000 adjustable "Pin Hitch". Tongue Stand Rock Basket For customers who have rock or other debris problems in their infields. Pin Hitch is standard 1-7/8" Ball Coupler **PACP**-1875 Connects behind hitch on tongue. 2.00" Ball Coupler PACP-2000 When the groomer is unhooked the stand keeps the end of the tongue off of Attaches behind rear blade Some customers prefer to have Ball Coupler the ground or floor. When storing the of leveler. Material travels over rear Hitches on all of the equipment they pull with groomer on concrete the caster wheel blade and falls into basket. Debris their tow machine. For this use we offer allows for easy movement of the catches in basket. 2 sizes of Couplers. They adjust up-down machine around the storage area. Easy removal to empty. (at end of tongue) just like the Pin Hitch. 2.00" and 1-7/8" available. Stand folds up out of the way while grooming (with one guick pin).

Heying company Heyir

Convert a Manual Lift groomer to Electric Lift. Customers who currently own a Manual Lift machine can convert to Electric Lift. More electric lift choices than any other manufacturer. Refer to info elsewhere in this catalog for details about electric lift systems.

PRWR-6000 "WR" Wireless Remote Control with 12v Battery on Groomer Elec Lift

PRSG-6000 "SG" Corded SwitchBox with 12v Battery on Groomer Elec Lift

PRSB-6000 "SB" Corded SwitchBox Elec Lift System (Uses Tow Machine Battery)

PRPW-6000 "PW" Portable Wireless Remote Control (Uses Tow Machine Battery)

PRHW-6000 "HW" Hard-Wired to Tow Machine Battery with Dash Switch

Warranty (in a nutshell): Heying Company machines carry the following warranty on parts and workmanship,

to be free of defects, under normal and intended use and service conditions, of:

Three (3) years parts and workmanship on Heying Company manufactured parts.

One (1) Year on parts not manufactured by Heying Company, including but not limited to:

Wheels, brushes, electrical cylinder (actuator), electric system parts, wireless remote control systems, switches, batteries, chargers, etc. Excluded is this warranty is Normal Wear and Tear on Parts resulting from natural and intended use.

(Note: Warranty above is a partial writing - for a complete warranty please inquire. If you discover a better warranty on similar equipment we would like to see it).

6 Lift Systems & How They Work in a nutshell

www.HeyingCompany.com www.Infield-Drag.com www.InfieldGroomer.com

Advantages: Exclusive "one-of-a-kind" control system....only offered by Heying Company! Made in USA!

Wireless Remote (hand held transmitter) Control - the Ultimate in user convenience (receiver mounts inside battery compartment). The wireless remote control has immediate response when a button is pressed. It never goes to sleep like many other wireless systems. Pull with a variety of tow machines. Can quickly switch from one tow machine to another. On-board electric system is completely self contained. On-board 2.0 amp battery charger has safe technology so it can (and should) be plugged in whenever the groomer is not being used. On-board battery monitor emits an audible alert when the battery needs to be charged.

No wiring needed to user tow machine. No Cords.

Corded Auxiliary Switch (and cord) included. 11 ft. long. Use to operate electric lift if transmitter is misplaced. Stores inside battery case. On-board electric system also makes it easier to move the groomer even when it's not connected to a tow machine (such as inside a storage shed).

Disadvantage: (Not really a disadvantage) User needs to keep the on-board battery charged. Just plug in the battery charger (use a standard 120v cord).

Worried about losing the Transmitter? System comes with 11.5 ft. long Corded Rocker Switch and two (2) manual wrenches that can be used in an emergency to manually raise / lower the electric cylinder. **Consider a "Backup Control System".** Customers who run tournaments or those who just want the peace of mind that they can operate the groomer if they have any problems (misplaced transmitter, dead battery, etc.)...will consider the "SB" Backup Operating System. The "SB" System is portable and can connect to any tow machine 12v battery. It's not used on a daily basis. Rather, it's stored, and used only when there is a problem with the main control system. It will override / bypass the entire original electric system (except the Cylinder).

Great Backup Control

HOW IL WOLKS. Power starts at the groomer battery. The 4 Conductor Tongue & Power Wire runs 2 way power towards the operator (through whichever extension wire is used) and onto the SwitchBox. From switch 2 way control is returned to the actuator on groomer.

The 12 ft. length extension wire is popular with customers who have UTV type tow machines. The 5 ft. length extension wire is popular with customers who have shorter tow machines such as garden tractors. Tongue Wire always stays on the groomer. Tongue wire connects at rear of tow machine to 1 of 2 extension wires. 5 ft. 5 ft. 1 of 2 extension wires. 5 ft. 1

Advantages: 12 volt electric system completely on-board the groomer provides all the power needed for lift / lower functions. Your tow machine battery is not needed to power the groomer electric lift (doesn't wear down your tow machine battery). Provides all day use. On-board 2.0 amp battery charger has safe technology so it can (and should) be plugged in whenever the groomer is not being used. On-board battery monitor emits audible alert when the battery needs to be charged. Versatile, Easy to Use, and Portable. Pull groomer with a variety of tow machines. Made in USA! Disadvantages: Inconvenience of having cords. Must pay constant attention to protecting the cords during use.

Note: This SG System is one of two systems we offer with 12 volt battery on-board the groomer (WR is the other).

Heying company

Heying Company Alton, Iowa 51003 Ph. 712.756.8847 Fax 712.756.8849 www.HeyingCompany.com www.Infield-Drag.com www.InfieldGroomer.com

Copyright Heying Enterprises. Made in USA Pg.

Corded SwitchBox Control powered by your Tow Machine 12v Battery. Hand held corded SwitchBox controller connects to the user's tow machine 12v battery (with alligator clips) to supply power to the electric lift on the groomer. Portable. Easy to move from one tow machine to another. Includes two extension wires. 12 ft. long extension wire popular with customers who have long UTV's and the 5 ft. long extension wire popular with customers who have shorter tow machines such as garden tractors. Can be used as a everyday lift control system, or, as an optional backup to other operator lift control systems.

Advantages:

Versatility to quickly switch to a different tow machine (control system is portable).

SwitchBox is completely weather sealed (unlike anything on the market). Made in USA!

Two "Cylinder Extension Wires" included (5 ft. and 121 ft.) so the user can decide which works best for their use.

Ability to be used as a primary (everyday) lift control system or as a backup to other operator lift control systems (use when needed).

No battery on-board the groomer to worry about (but it does need power from your 12v tow machine).

We include a battery compartment (even though a battery is not included). Very useful to store control parts and tools.

Disadvantages:

Inconvenience of having cords. Must pay constant attention to protecting the cords during use.

Big Users (who have lots of grooming) could experience this system wearing down the battery of their tow machine.

This system requires power from user tow machine. User cannot raise and lower implements without being attached to tow machine for power.

Since power is supplied by a tow machine the groomer is more difficult to move around storage shed, etc.

Note: We have 2 Systems (WR and SG) that provide 12 volt power from the groomer so they don't need power from your tow machine.

"PW" Portable Wireless Remote Control.

Same wireless Transmitter - Receiver as the "WR" but uses 12v battery of user's Tow Machine for power. Includes portable power harness that connects to tow machine battery. The groomer also has a connection harness. These two wires connect at the rear of the tow machine to power the electric system. "Worried about losing the Transmitter"? We include a corded auxiliary rocker switch & cord that can be used as a temporary backup control of the electric lift if you misplace the wireless transmitter.

Unlike anything else on the market!

Advantages:

Wireless Remote Control System for "the Ultimate in User Convenience" at a lower price than the "WR".

The wireless remote control has immediate response when a button is pressed. It never goes to sleep like many other wireless systems. Lighter weight than the "WR" system (No battery so is not as heavy to lift the tongue). Advantage especially for those who want the

Spring Tine Scarifier on their groomer (Spring Tine Scarifier mounts to front of machine thus adding weight to the Tongue). Portable System. Pull with a variety of 12 volt tow machines. Can quickly switch from one tow machine to another. Disadvantages:

Inconvenience having to plug in the connector (when connecting to tow machine) and unplugging connector behind tow machine (when unhooking). For some big users (lot of fields or lots of grooming on fewer fields) this system could wear down the battery of the tow machine.

If this is a concern then consider the "WR" system.

This system requires power from user tow machine 12v battery. User can't raise or lower implements without being attached to tow machine for power. Note: The "WR" is the only system that does not require power from user tow machine.

Worried about losing the Transmitter? System comes with 11.5 ft. long Corded Rocker Switch and two (2) manual wrenches that can be used in an emergency to manually raise / lower the electric cylinder. **Consider a "Backup Control System".** Customers who run tournaments or those who just want the peace of mind that they can operate the groomer if they have any problems (misplaced transmitter, dead battery, etc.)....will consider the "SB" Backup Operating System. The "SB" System is portable and can connect to any tow machine 12v battery. It's not used on a daily basis. Rather, it's stored, and used only when there is a problem with the main control system. It will override / bypass the entire original electric system (except the Cylinder).

Great Backup Control

"HW" Hard-Wired Operator Lift Control System (12v only)

System uses 12v battery of your tow machine. Includes all necessary wiring, in-dash mountable rocker switch, electric cylinder (actuator), fuse holder, fuse, wire, connectors, protective split loom, cable clamps, and zip ties.

For users who have a tow machine with a dash panel that will accept a Rocker Switch, who want the convenience of a dash mounted rocker switch, and who want to always use the same tow machine to pull and operate the groomer this is the operator system of choice. Note: Optional additional wiring package available for users who wish to wire more than one tow machine to pull and operate the groomer. See optional "HW" tow machine wiring package information.

Advantages: Rocker Switch is installed on dash of Tow Machine for convenience.

Easy to use connectors at the groomer tongue and rear of tow machine.

Disadvantages: User must dedicate a specific tow machine to always pull the groomer. Or, order additional wiring packages for more tow machines. You can also consider an optional SB or SG or PW System to use as a portable backup for when the original dedicated tow machine is not available to pull the groomer. *See optional accessories*).

Big Users (who have lots of grooming) could experience this system wearing down the battery of their tow machine.

Since power is supplied by a tow machine the groomer is more difficult to move around storage shed, etc.

Note: The "WR" and "SG" systems have 12v batteries on board the groomer. They do not need to connect to the user's Tow Machine to power the groomer.

"HW". Concerned about having only one Tow Machine able to operate the groomer? Consider an additional "HW" Wiring package (optional) to wire a second Tow Machine. Or consider a "Backup Control System". Customers who run tournaments or those who just want the peace of mind that they can operate the groomer if they have any problems (misplaced transmitter, dead battery, etc.)....will consider the "SB" Backup Operating System. The "SB" System is portable and can connect to any tow machine 12v battery. It's not used on a daily basis. Rather, it's stored, and used only when there is a problem with the main control system. It will override / bypass the entire original electric system (except the Cylinder).

Great Backup Control

Heying Company Alton, Iowa 51003 Ph. 712.756.8847 Fax 712.756.8849 www.HeyingCompany.com www.Infield-Drag.com www.InfieldGroomer.com

 HW_{21}

"MN" Manual Lift Control System

Manual "Posi-Lock" Lift Arm Control System.

For customers who simply want a manual lift Pro Groomer.

Includes a Locking Pin on the Lift Arm. Squeeze the locking pin while pulling down on the lift arm raises the Leveler and all other Implements.

When released, the locking pin falls into slots in the "posi-lock" quadrant and holds the implements in a downward locked position during use and locks the implements in a raised position when traveling on and off the field.

After the locking pin is "locked" in position fine adjustments can be made to the implements with the Turnbuckle.

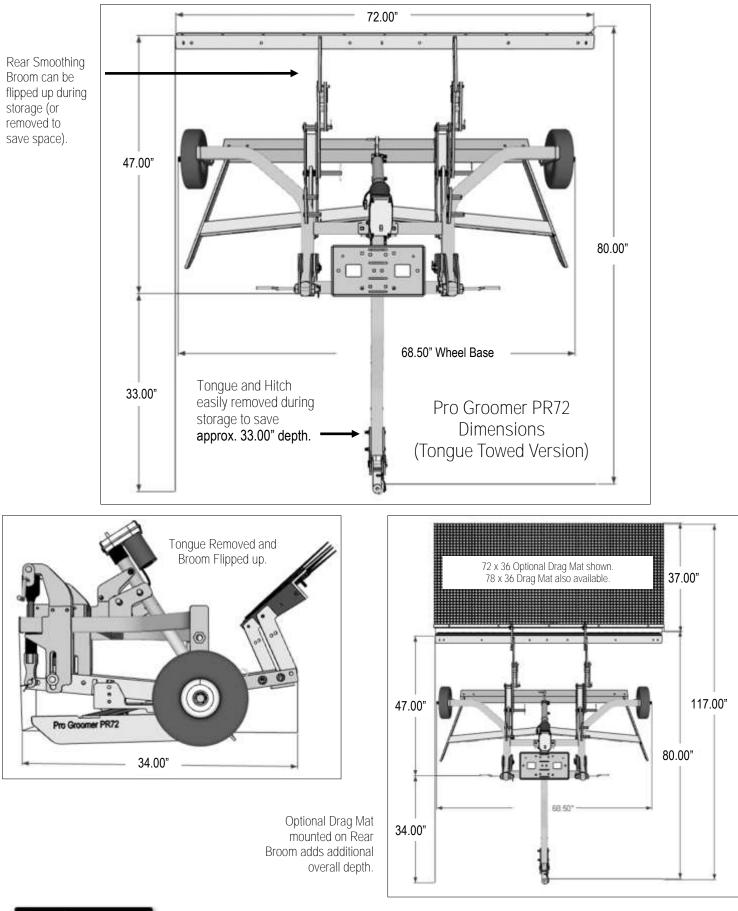

Advantages: Lower Cost Easy to operate. No wiring needed to user tow machine.

Disadvantages: User must stop when arriving on the infield to lower the implements by hand using the manual lift. User must stop before leaving the infield to raise the implements for travel. No ability to make adjustments on the fly like the electric lift models.

Heying company Heying Con www.Heying

All Groomers from Heying Company

WARRANTY

Heying Company machines carry the following limited warranty, from date of possession to the end user, on parts and workmanship, and to be free of defects, under normal and intended use and service conditions, of:

3 years parts and workmanship on Heying Company manufactured parts.

One (1) Year on parts not manufactured by Heying Company, including but not limited to: Wheels, brushes, electrical cylinder (actuator), electric system parts, wireless remote control systems, switches, batteries, chargers, etc.

Excluded is this warranty is Normal Wear and Tear on Parts resulting from natural and intended use.

Heying Company's obligation under this warranty is limited to replacement or repair at the manufacturer's option. Proof of purchase must accompany any and all warranty claims to Heying Company.

This warranty does not extend to any product or damage to a product caused by, or attributed to freight damage, abuse, misuse, improper or abnormal usage, improper storage or changes and repairs unauthorized by Heying Company including to towing machines.

All freight damage claims must be made immediately and directly to the freight carrier by the purchaser or end user. It is not the responsibility of Heying Company to report damaged freight to freight companies. We guarantee that all shipments leave our facilities free from damage.

Heying Company is not liable for direct or indirect, special or consequential damages arising from, or in connection with, the use or performance of the product or damages with respect to any economic loss, personal injury, loss or damage to property, loss of revenues or profits, or loss of enjoyment.

Any full machine, assembly or individual part returned to Heying Company for refund, replacement or repair must have sufficient proof of purchase included, prior written authorization from Heying Company, be packaged as instructed by Heying Company, and have all freight charges prepaid.

Product returns are subject to re-painting and re-stocking charges.

No other warranty beyond that specifically stated above is authorized or intended by Heying Company.

Choosing a tow machine is the sole responsibility of the user. User should always consult with the towing machine manufacturer for towing capacity and suitability. Heying Company makes no claim and carries no responsibility as to the ability or capacity of any towing machine to be used.
